Mr. Archie Mackie, Jr.
Product Director, Enterprise Computing (EC)

Mr. Archie Mackie, Jr. is the Product Director for Enterprise Computing. In this capacity, he oversees Enterprise Computing's portfolio that consists of four primary initiatives: Army Data Center Consolidation Plan (ADCCP), Army Enterprise Service Desk, Army Software Marketplace, and Common Operating Environment. Army Cloud initiatives and virtual end user environment initiatives will be brought under PD EC as they are developed and mature to a point requiring program management support.

Prior to his selection as Product Director, Mr. Mackie served as the Deputy Director, then acting director for PD EC where he was responsible for establishing an Army Application Migration Business Office. Established to support the Undersecretary of the Army Memorandum for Migration of Army Enterprise Systems/Applications to Core Data Centers, this serves as the Army's single point of contact to migrate all Army applications to a DoD Approved Enterprise Facility.

Mr. Mackie joined the Program Executive Office for Enterprise Information Systems (PEO EIS) in 2008 as as Functional Management Branch Chief before transitioning to Assistant Project Manager for Transportation Information Systems (TIS). While supporting the TIS mission, he validated and reviewed requirements to maintain traceability throughout the Software Development Lifecycle process, developed requirements and managed system development of new functionality within the Transportation Coordinators' - Automated Information for Movements System II (TC-AIMS II) which displaced a legacy National Guard system. While serving as Chief for the Operations Division of Automated Movement and Identification Solutions, Mr. Mackie was responsible for the lifecycle management of a software-intensive enterprise acquisition program. In 2013, he supported Project Director, Enterprise Services as Project Officer for ADCCP. During his tenure with the organization, he managed the ADCCP's cost, schedule and performance.

Prior to joining PEO EIS, Mr. Mackie served as the Deputy Director and Senior Operations Manager at the White House Transportation Agency, where he managed the operational readiness program for a Presidential Support Activity Unit.

Mr. Mackie received a BS in Business from Excelsior College and a MS in Project Management from Florida Institute of Technology. He is the recipient of the Department of the Army Commander's Award for Civilian Service and the 2009 International Society of Logistics Award for Logistics Information Systems. In 2013, Mr. Mackie was inducted as a Distinguished Member of the Regiment by Transportation Corps.
